
Up to 2005, original works and translations in other languages were collected and can be found in the bibliography eurythmy (Beatrix Hachtel, Dr. med. Angelika Gäch: Bibliographie Heileurythmie, NMM-Verlag 2007, 610 S.).

This following list of foreign-language publications includes mainly publications which where found since then. It represents only a step, and is to be regarded as in any way uncompleted. The list is sorted by language in alphabetical order.

The articles and books are so far predominantly English-language translations from German publications of the Forum/Network Eurythmy Therapy and the medical section, but also research literature and other original works. Some Dutch texts are included and an extensive collection of Russian translations compiled by Tatiana Strizhak.

The list is expected to be updated in the course of further work in the beginning of 2015. Work on the collection from 2005 is generously funded by the "STIFTUNG zur Förderung der HEILEURYTHMIE"

Since the eurythmy therapy usually is part of a master plan within the concepts of Anthroposophic Medicine, and a major thematic environment for eurythmy exists, the articles are rubricated:

HE - primarily text about eurythmy therapy
M - primarily medical text
Ps - primarily psychological text
E - primarily eurythmic text
P - primary educational text
HP - primarily special education text
K - primarily text about art therapy
